

# IDEA

## ① Chloropleth map

## ② STACKED AREA CHART

## ③ STREAM GRAPH

## ④ SMALL MULTIPLES WITH LINE CHRT:

## ⑤ WITH BAR CHART:

## ⑥ Parallel coordinate Plot:

## ⑦ RADAR CHART

## ⑧ Lolipop chart:

## ⑨ ISOTYPE :

## ⑩ Population pyramid

# FILTER

## ① Chloropleth map

## ② streamgraph

## ⑤ Small multiples with bar charts

## ④ Parallel coordinate Plot

## ⑨ Isotype

# CATEGORIZE

Unemployment rate & labour market

a. chloropleth map : ①

b. Small multiples with bar charts : ⑤

GDP & the relationship with labour market.

a. Parallel coordinate plot : ⑥

b. stream graph : ③

Underemployment

a. Isotype : ⑨

# COMBINE & REFINE

## Isotype

## Small multiples with bar charts

## QUESTION

1) Does the combination of isotype and bar small multiples too complex?

2) Is streamgraph the better choice than the stacked area chart?

# LAYOUT

Title: Labor market & GDP in Malaysia  
 Author: Chua Wen Yang  
 Date: 02/10/2024  
 Sheet: 2  
 Task: Create layout for A2.

## OPERATIONS:

Select the year can show the choropleth map with the data on the selected year.

2023
2022
2021
2020

Select the legend can highlight the area of that region

eg. click on purple legend highlight

Select the legend can highlight the line of that sector.

## FOCUS:

- ↳ Does not specifically focus on a chart, all are important.
- ↳ Viewer looks from top to bottom.
- ↳ Arrange from map, multiples, stream graph, and, parallel coordinate plot with isotype at the same level.

## DISCUSSION:

### Advantages:

- ↳ Layout will be balanced
- ↳ Less white space

### Disadvantages:

- ↳ Crowded at the bottom since 2 graphs at the same level with text.

# LAYOUT

Title: Labour Market & GDP in Malaysia

Sheet: 3

Task: Create layout for A2.

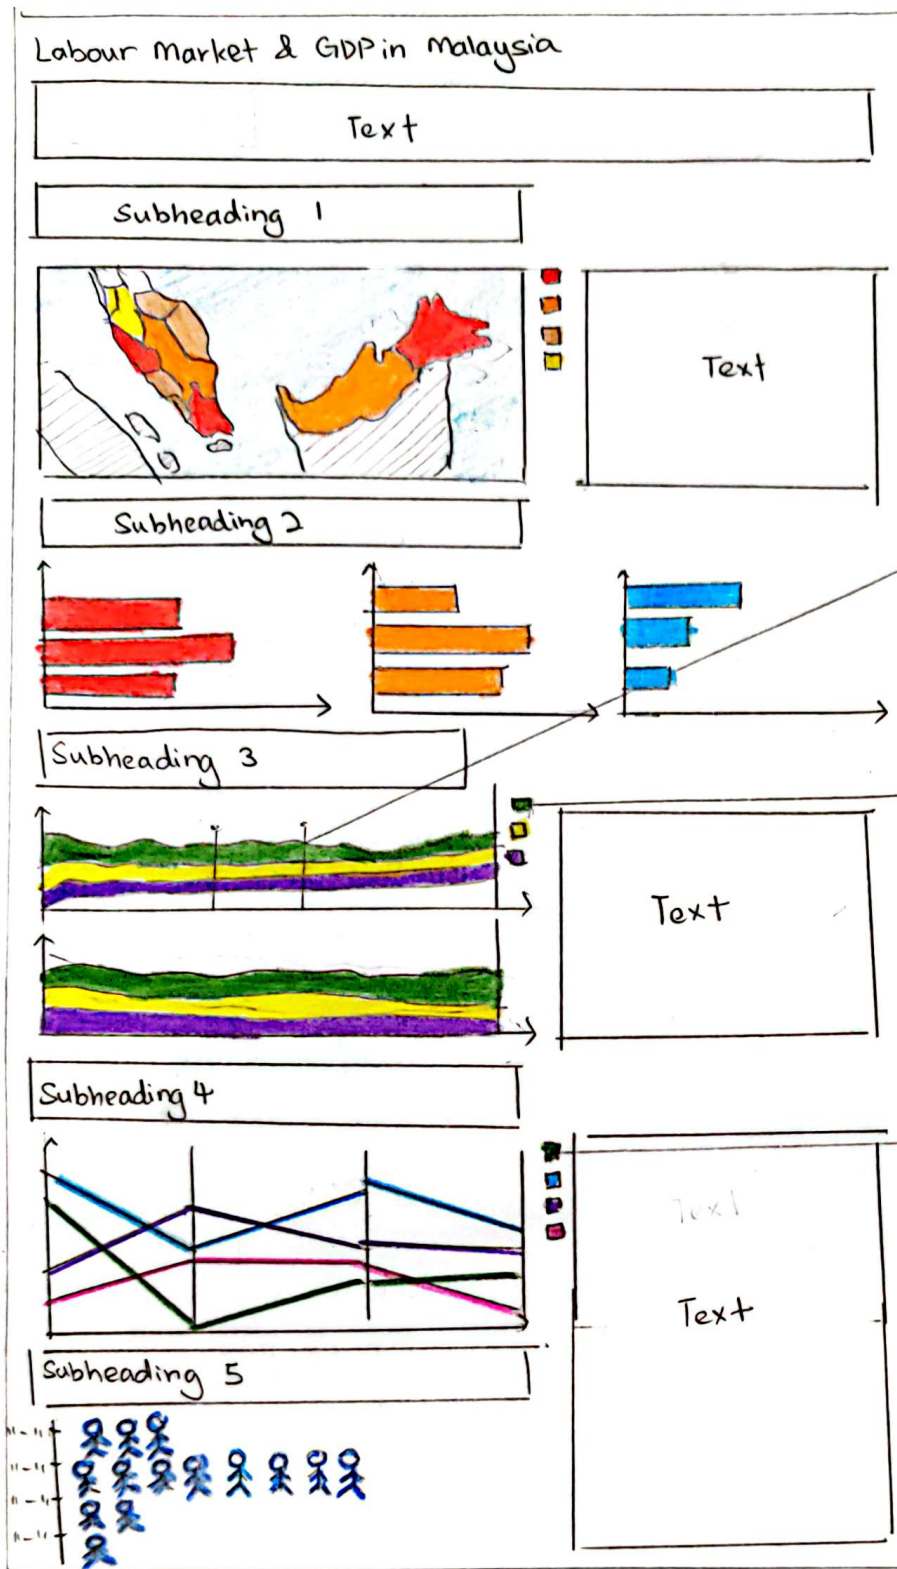

## OPERATIONS:

Slide the box to magnify the graph to see the detail, the bottom graph shows it.

Select the legend can highlight the area of that region

Select the legend can highlight the line of that sector.

## FOCUS:

- ↳ Does not specifically focus on a chart, all are important.
- ↳ Viewer looks from top to bottom.
- ↳ Arrange from map, small multiples, stream graph, parallel coordinate plot, isotype.

## DISCUSSION:

### Advantages:

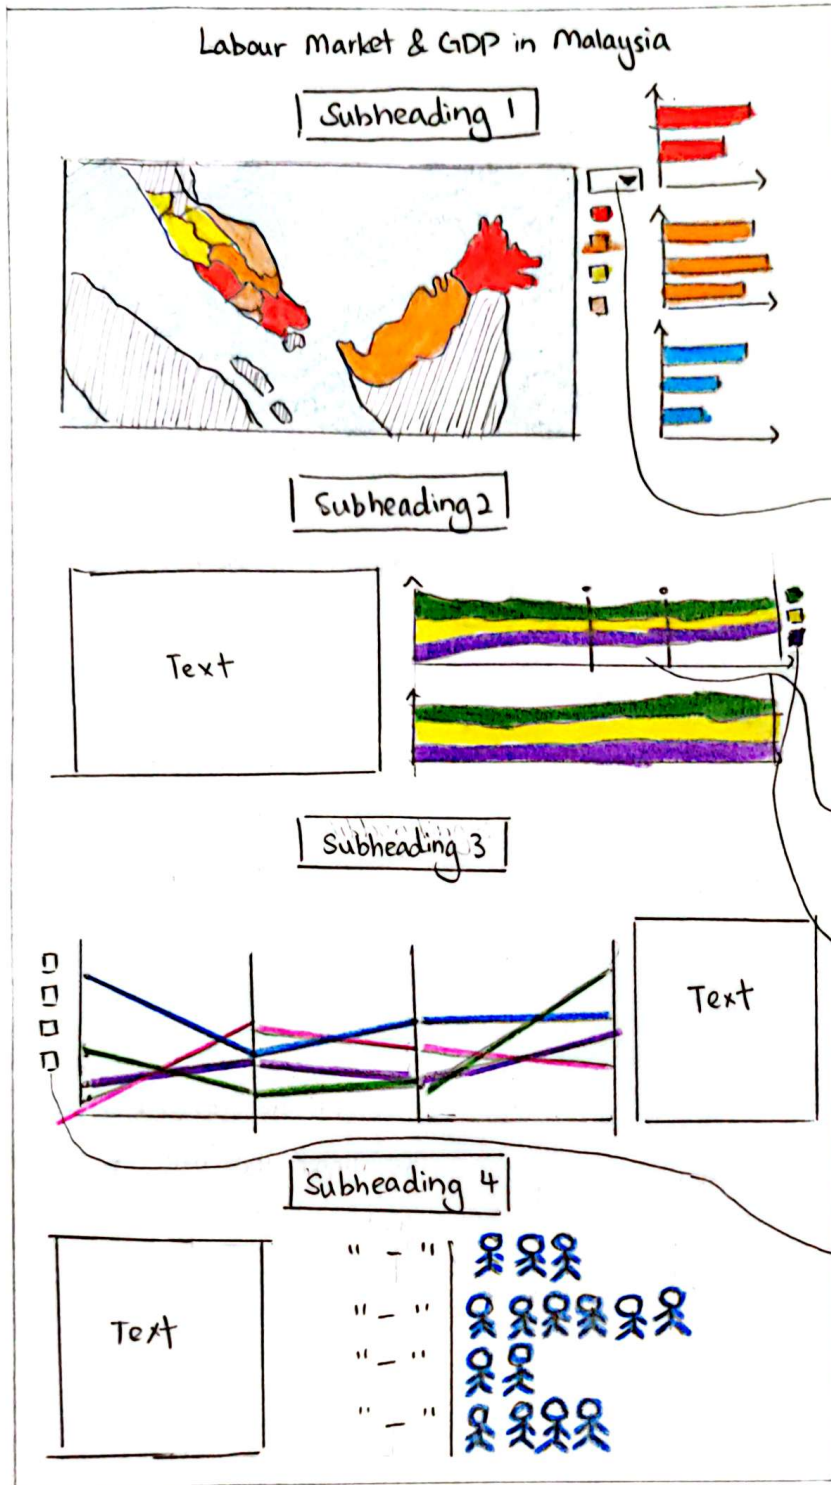

- ↳ Less white space
- ↳ less crowded at bottom

### Disadvantages:

- ↳ will lead to too many text
- ↳ might be a little bit unbalanced.

# LAYOUT
